PORTS OF SEATTLE & TACOMA:
PORT SOLUTIONS FOR ANY SUPPLY CHAIN CHALLENGE

THE NORTHWEST SEAPORT ALLIANCE
SEATTLE + TACOMA

STREET TURNS

A **street turn** is an effective way for both importers and exporters to maximize assets and reduce cost via an inland container interchange.

After a full import container is unloaded at destination, the empty container is interchanged with an exporter for loading at an inland location (rail ramp or off-dock CY), lowering cost and drayage mileage for both parties.

SUPPLY CHAIN BENEFITS

- Cost savings for both importer and exporter
- Time savings through elimination of empty return trip and faster loading/unloading
- Easier access to empty containers
- Lower fuel usage and drayage mileage
- Reduced emissions and environmental impact

HOW TO GET STARTED:

- Identify import/export partner in close proximity
- Align ocean carrier, container type, and chassis requirements
- Identify rail ramp, off-dock CY, or other location with container handling equipment
- Arrange container interchange with ocean carrier or contact street turn platform provider
- Contact the NWSA Business Development Team for additional support

OFF-DOCK CONTAINER YARD OPTIONS

The NWSA Business Development Team is dedicated to providing resources and support for your cargo movement.

For a consolidated list of local off-dock container yard options and contacts, please visit the NWSA website.
